

- HALLMARK EPITHELIAL MESENCHYMAL TRANSIT
- HALLMARK TNFA SIGNALING VIA NFKB
- Golgi vesicle transport
- HALLMARK INTERFERON GAMMA RESPONSE
- Signaling by Rho GTPases, Miro GTPases and RHOI
- tube morphogenesis
- actin filament-based process
- Vesicle-mediated transport
- ribosome biogenesis
- carbohydrate derivative biosynthetic process
- heart development
- Cytoskeleton in muscle cells
- Cytokine Signaling in Immune system
- intracellular protein transport
- HALLMARK APOPTOSIS
- mitochondrial gene expression
- Focal adhesion
- Protein processing in endoplasmic reticulum
- carboxylic acid metabolic process
- enzyme-linked receptor protein signaling pathway
