

- HALLMARK TNFA SIGNALING VIA NFKB
- HALLMARK EPITHELIAL MESENCHYMAL TRANSIT
- tube morphogenesis
- positive regulation of cell migration
- heart development
- actin cytoskeleton organization
- regulation of cell projection organization
- response to hormone
- extracellular matrix organization
- skeletal system development
- response to wounding
- enzyme-linked receptor protein signaling pathway
- RHO GTPase cycle
- Vesicle-mediated transport
- tissue morphogenesis
- Cytokine Signaling in Immune system
- HALLMARK UV RESPONSE DN
- regulation of anatomical structure size
- embryo development ending in birth or egg hatching
- cellular response to growth factor stimulus
