

- HALLMARK TNFA SIGNALING VIA NFKB
- Cytokine Signaling in Immune system
- HALLMARK INTERFERON GAMMA RESPONSE
- HALLMARK EPITHELIAL MESENCHYMAL TRANSIT
- HALLMARK MTORC1 SIGNALING
- Epstein-Barr virus infection
- tube morphogenesis
- regulation of hydrolase activity
- TNF signaling pathway
- protein catabolic process
- Extracellular matrix organization
- Transport of small molecules
- Protein processing in endoplasmic reticulum
- carbohydrate derivative biosynthetic process
- protein maturation
- Neutrophil degranulation
- Pancreatic cancer subtypes
- actin filament-based process
- Metabolism of lipids
- response to endoplasmic reticulum stress
