

- Extracellular matrix organization
- Hemostasis
- Regulation of Insulin-like Growth Factor (IGF) transpo
- Interleukin-4 and Interleukin-13 signaling
- Non-integrin membrane-ECM interactions
- Plasma lipoprotein assembly, remodeling, and cleara
- Cell junction organization
- O-linked glycosylation
- Neuronal System
- Nervous system development
- Signaling by Receptor Tyrosine Kinases
- Transport of small molecules
- Cell surface interactions at the vascular wall
- Regulation of gene expression in endocrine-committ
- Signaling by TGFB family members
- Interleukin-10 signaling
- Semaphorin interactions
- Binding and Uptake of Ligands by Scavenger Recept
- Mitotic G1 phase and G1/S transition
- Muscle contraction
