

- Extracellular matrix organization
- Non-integrin membrane-ECM interactions
- Elastic fibre formation
- Nervous system development
- Cytokine Signaling in Immune system
- Hemostasis
- Regulation of Insulin-like Growth Factor (IGF) transpo
- Smooth Muscle Contraction
- Signaling by Receptor Tyrosine Kinases
- Diseases of glycosylation
- Glycosaminoglycan metabolism
- Chemokine receptors bind chemokines
- Cell surface interactions at the vascular wall
- Cell junction organization
- Chondroitin sulfate biosynthesis
- Interferon alpha/beta signaling
- Amino acid transport across the plasma membrane
- Activation of Matrix Metalloproteinases
- Cell-extracellular matrix interactions
- Netrin-1 signaling
