

- HALLMARK TNFA SIGNALING VIA NFKB
- Neutrophil degranulation
- Cytokine Signaling in Immune system
- actin filament-based process
- HALLMARK INTERFERON GAMMA RESPONSE
- hemopoiesis
- cellular response to cytokine stimulus
- import into cell
- positive regulation of cell motility
- inflammatory response
- innate immune response
- enzyme-linked receptor protein signaling pathway
- RHO GTPase cycle
- regulation of cell activation
- response to wounding
- Extracellular matrix organization
- HALLMARK COMPLEMENT
- HALLMARK INFLAMMATORY RESPONSE
- Hemostasis
- VEGFA VEGFR2 signaling
