

- HALLMARK TNFA SIGNALING VIA NFKB
- tube morphogenesis
- HALLMARK EPITHELIAL MESENCHYMAL TRANSIT
- tissue morphogenesis
- Asparagine N-linked glycosylation
- Vesicle-mediated transport
- enzyme-linked receptor protein signaling pathway
- positive regulation of cell migration
- actin cytoskeleton organization
- response to hormone
- heart development
- skeletal system development
- HALLMARK TGF BETA SIGNALING
- gland development
- intracellular protein transport
- Cytokine Signaling in Immune system
- Extracellular matrix organization
- regulation of plasma membrane bounded cell project
- positive regulation of cell adhesion
- Hemostasis
